

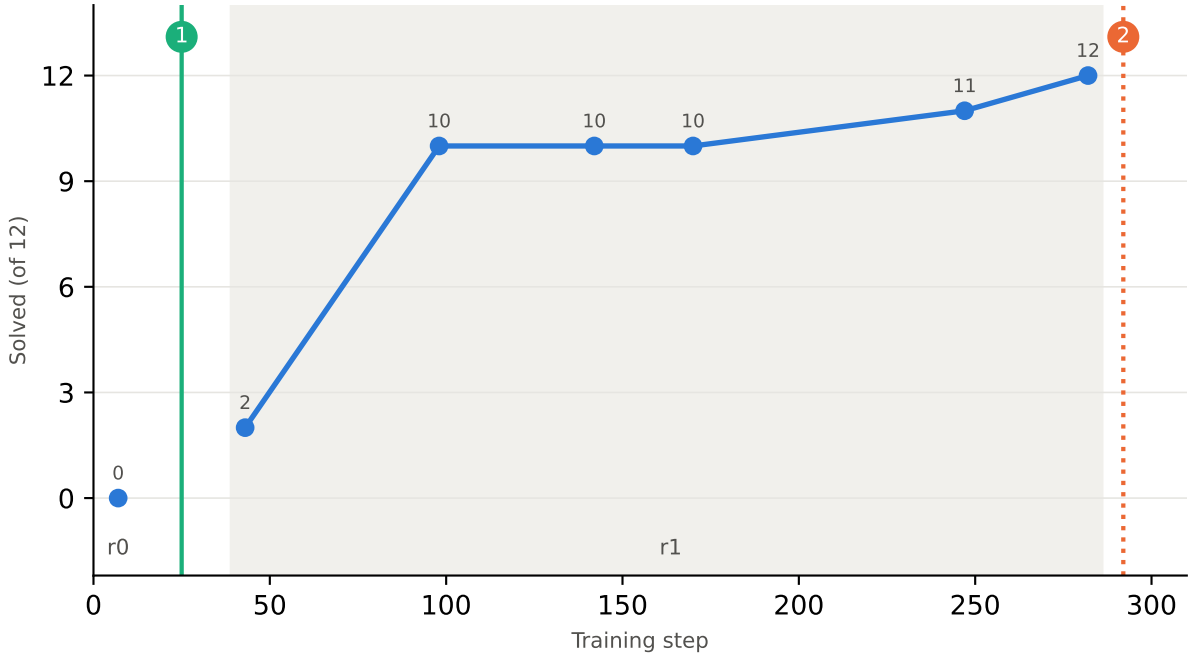
1. [harder] Add C11 fundamental-alignment requirement for every returned block.
2. [easier] Remove the added alignment check (8/12 had fixed the original bug and failed only this).



1. [easier] Fix the self-contradictory run-length comment in rle.h (every attempt built an off-by-one codec); tests only merge three asserts into one. No code or patch given.
2. [harder] Harder follow-up (accepted after the task's last trained group).
